

SENVION is one of the five world's largest wind turbine manufacturers, with over 3300 employees, nearly 8000 wind turbines, headquarters in Germany and offices worldwide. We develop, produce and maintain wind turbines and enjoy a reputation for quality products and providing excellent service. Now, due to growth of our activity, we are looking for dynamic candidates for our Onshore Service Center located in Houthalen-Hechteren.

Job description : **Onshore Wind turbines Service Technician**

Location: **3530 Houthalen-Hechteren, Belgium**

#### **Responsibilities:**

- Completion of service and maintenance work on onshore wind turbines
- Self-reliant trouble-shooting
- Perform repairs on electronic and hydraulic systems, mechanical components as well as instrumentation and control equipment
- Guarantee of process oriented workflows, implementation of technical and service-specific guidelines
- Apply safety rules

#### **Profile:**

- Vocational qualifications in Electrical Engineering (specialization in industrial installations or power systems) or Mechatronic
- Excellent understanding of instrumentation and control technology, hydraulics, power electronics and general mechanics
- Autonomous, well-structured and results-oriented approach to work
- High degree of flexibility and motivation
- Physical fitness and ability to work at heights
- Drivers license
- Language: English and French, Dutch would be an advantage

If you enjoy working within a truly dynamic environment and are keen to join an energetic company with flat hierarchies and excellent career prospects, we look forward to hearing from you. Please send us your full application stating your earliest start date. In case of queries please do not hesitate to contact us.
